

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Specification:

The paragraph on page 21, beginning at line 19 has been amended as follows:

The present invention also includes a method for measuring the PAP horizontal coordinate 132. As illustrated in Fig. 20, the PAP horizontal coordinate 132 is the distance from the I-point 140 to the center 134 of the grip measured along the midline 136. The method for measuring the PAP horizontal coordinate 132 is substantially similar to the method for measuring the PAP vertical coordinate [130] 131. However, after locating the I-point 140, any one of the indicator arms 6, 8, 10, 12 is used to measure the PAP horizontal coordinate 132 along line 136.
